CUMULATIVE INDEX FOR VOLUMES 1 - 10

A. ARTICLES
B. BOOK REVIEWS
C. PERSONAL

A. Articles

Agoston, Max K., Twenty years of differential topology: some highlights. 4,77

Balasubramanian, G., See Somasundaram, D. 9,137

Barve, Saroj, See Chandra, Prem., 6,72

Berg, I.D., Perturbations of operators and the Fredholm index. 9,91

Bhoosnurmath, Subhas S., See Gopalakrishna, H.S. 8,73

Breusch, Robert, The prime number theorem and its proofs. 1,61

Broughan, K.A., Pseudometrizability of saturated topological spaces. 3,81

———, Shrinking finite topologies. 3,85

———, and M. Schroder, Variations on a metric theme. 3,71

Bull, R.A., Mathematical logia. 2,17

Bullen, K.E., The earth and mathematics: viewpoint of an applied mathematician. 1,117

———, Introduction to a 'variorum edition' of Newton's principia. 3,137

———, Free earth oscillations and the internal structure of the earth. 5,17

Burns, J.C., Drag on a sphere in non-uniform axially symmetric Stokes flows. 9,5

Busemann, Herbert, Transitive geodesics in Minkowski planes. 1,27

Butcher, J.C., Computation and theory in ordinary differential equations. 3,63

Calvert, Bruce, Dirichlet problems without coercivity by the Perron-Akô-Constantinescu method. 6,48

———, The range of a contractive projection. 6,68

Chandra, Prem, and Saroj Barve, On the relative strength of matrix transformations and its application. 6,72
Cohen, G.L., and M.D. Hendy, Polygonal supports for sequences of primes. 9,120

—, and M.D. Hendy, On odd multiperfect numbers (Addendum to "Polygonal supports for sequences of primes"). 10,57

Coppel, W.A., Mathematics from control theory. 5,8

Coxeter H.S.M., Angles and arcs in the hyperbolic plane. 9,17

Crossley, J.N., Satisfaction (a brief survey of model theory). 3,1

de Jager, E.M., See R. Geel. 8,25

Dikshit, G.D., Absolute Norlund summability of Fourier series. 2,117

Franchetti, C., and P.L. Papini, Some metric properties of hyperplanes in real normed spaces. 6,82

Francis, I., Factor analysis: Fact or fabrication. 3,9

Gani, J., The spread of epidemics. 10,1

Gardner, B.J., Some current issues in radical theory. 8,1

Gauld, David B., Submersions and foliations of topological manifolds. 1,139

—, Foliations on topological manifolds. 2,29

—, PL_k is not locally contractible if k > 4. 2,125. Correction. 4,75

—, Local contractibility of PL(M) for a compact manifold. 4,1

—, Calculating homology groups using submersions. 4,90

—, Nearness - a better approach to topology. 7,84

Geel, R., and E.M. de Jager, Initial value problems for singularly perturbed non linear ordinary differential equations. 8,25

Gilmore, Lynette, and Peter Lorimer, Transpositions in finite symmetric groups. 3,89

Grattan-Guinness, I., Lectures on the history of mathematics and mathematical education. 7,105

Gopalakrishna, H.S., and Subhas S. Bhoosnurmath, Exceptional values of differential polynomials. 8,73

Hagan, Melvin R., Continuity of pseudo-open multifunctions. 7,69

Hamlett, T.R., The at worst removable discontinuities of functions and cluster sets. 4,94

—, Semi-continuous functions. 4,101

—, The property of being a Baire space is semi-topological. 5,166

——*, *H-closed spaces and the associated θ-convergence space*. 8,83

Hammers, William D., See P.E. Long. 4,122

——*, *Left invertible spaces*. 5,70

Hannan, E.J., *Time series*. 9,101

Harris, John H., See M.K. Rennie. 3,99

Hendy, M.D., See G.L. Cohen. 9,120

Hendy, M.D., See G.L. Cohen, 10,57

——*, *Characterizations of P-closed spaces*. 8,89

Hoe, J., *The jade mirror of the four unknowns - some reflections*. 7,125. Corrections. 8,186

Hogan, D.T., *Extensions of real valued functions*. 4,7

——*, *Quotient quasi-uniformities*. 4,108

Hunter, Jeffrey J., *On the occurrence of the sequence SF in Markov dependent Bernoulli trials*. 2,131

James, D.G., *On the automorphisms of det(x_i,j)*. 9,35

Joseph, James E., *Uniform boundedness generalizations*. 7,77. Corrections. 8,186

——*, *θ-closure and θ-subclosed graphs*. 8,99

Kalman, J.A., *The free distributive system with one generator*. 1,147

——*, *Applications of subdirect products in general algebra*. 3,45

——*, *The transition from school to university*. 3,135

——*, *The join of the varieties of implication algebras and semilattices*. 9,41

Karunakaran, V., *On a class of meromorphic starlike functions in the unit disc*. 4,112

Khan, Muzoor H., *On the degree of approximation IV*. 10,63

——*, *The spectrum of a discrete Wold's point process*. 6,90

Lal, Shiva Narain, *On the localisation of the absolute summability of the r-th derived series of Fourier series*. 7,48
Lancaster, H. O., *Development of the notion of statistical dependence.* 2,1

Lee Peng-Yee, *A non-standard convergence theorem for distributions.* 1,81

———, *The uniqueness of a Riesz-type definition of the Lebesgue integral.* 1,85

———, *Some problems in integration theory.* 2,105

Logan, G. J., *Note on the Frattini-Neumann-Schmidt intersection theorem.* 5,65

Lorimer, Peter, *On a class of algebras arising in numerical analysis.* 1,13

———, *The construction of semifields.* 1,129

———, See L. Gilmore. 3,89

———, *An introduction to projective planes: some of the properties of a particular plane of order 16.* 9,53

Manley, P. L., *A note on simple rings.* 6,113

Morris, Sidney A., *Duality and structure of locally compact abelian groups ... for the layman.* 8,39

Neumann, B. H., *The reflection principle.* 5,1

Nield, D. A., *On the wave number for convection in a horizontal layer.* 1,77

———, *On the inviscid solutions of the Orr-Sommerfeld equation.* 2,43

Papini, P. L., See C. Franchetti. 6,82

Pathan, M. A., *On a summation of \( _2F_1 \).* 7,57

Pedoe, Dan, *On geometrical matters.* 9,67

Peterson, J. G., *Single axioms for the classical equivalential calculus.* 6,21

Phadke, B. B., *Analalogues of Pappus' Theorem.* 3,95

Price, T. M., *Towards classifying all manifolds.* 7,1

Rees, Charles S., *Egyptian fractions.* 10,13

Reilly, Ivan L., *On quasi uniform spaces and quasi pseudo metrics.* 1,71

———, and Stuart N. Young, *Quasi-components in bitopological spaces.* 3,115
Renner, R.M., Evaluation by power series of the means of normal order statistics of samples of sizes six and seven. 4,141

Rennie, M.K., and John H. Harris, Russell's paradox: Correspondence on the MacLane and Birkhoff exposition. 3,99

Rigby, J.F., Congruence axioms for absolute geometry. 4,13

Robinson, D.F., Constructing an annual round-robin tournament played on neutral grounds. 10,73

Schroder, M., See K.A. Broughan. 3,71

———, Adherence operators and a way of multiplying convergence structures. 4,148

———, Analogues of the compact-open topology. 10,83

Somasundaram, D., and G. Balasubramanian, Locally Lindelöf spaces. 9,137

Stewart, Ian, Catastrophe theory. 5,140

Szczerska, L.W., Notions in geometry. 6,1

Tee, G.J., Sof'ya Vasil'yevna Kovalevskaya. 5,113

———, The pioneering woman mathematicians. 10,31

Thompson, H.R., A survey of the work of the Applied Mathematics Division D.S.I.R. 5,46

Wake, G.C., Stakgold's method of obtaining fundamental solutions. 2,53

———, A functional boundary value problem. 4,163

Walker, W.J., An application of the Poincaré-Bendixson theory to a three dimensional system of equations. 4,171

———, Predator-prey systems with higher codimension singularities. 7,157

Withers, C.S., Infinite products. 10,99

Wong, W.J., Recent work on finite simple groups. 1,5

Woods, L.C., "Scale": a basic concept in applied mathematics. 9,75

Yadav, Sarjoo Prasad, Absolute Cesàro summability of an orthonormalised Jacobi series. 7,63

Yamamuro, S., Groups of C∞-diffeomorphisms and differentiation in locally convex spaces. 8,57

Young, Stuart N., See Ivan L. Reilly. 3,115
B. Book Reviews

Budden, F.J., The fascination of groups (Review by P.J. Lorimer). 3,127

Burghes, D.N., and A.M. Downs, Modern introduction to classical mechanics and control (Review by D.A. Nield). 8,170

Chorlton, F., Vector and tensor methods (Review by R.C. King). 8,179

Clemmow, P.C., An introduction to electromagnetic theory (Review by W. Davidson). 4,179

Cohen, I. Bernard, Introduction to Newton's 'Principia' (Review essay by K.E. Bullen). 3,137

———, and Alexander Koyré (eds.), Isaac Newton's philosophiae naturalis principia mathematica (Review by H.G. Forder). 3,120

Downs, A.M., See Burghes, D.N. 8,170

Gear, C. William, Numerical initial value problems in ordinary differential equations (Review by J.C. Butcher). 3,130

Higgins, P.J., An introduction to topological groups (Review by Tom Price). 7,96

Hille, E., See Salas, S.L. 5,194

Hoe, John, Les systèmes d'équations polynômes dans le Siyuán yùjian (Review by M.J.J. Lennon and G.J. Tee). 8,171

Hofmann, Joseph E., Leibniz in Paris 1672-1676, his growth to mathematical maturity (Review by G.J. Tee). 7,98

Hosking, R.J., D.C. Joyce and J.C. Turner, First steps in numerical analysis (Review by G.J. Tee). 10,132

Howson, A.G., A handbook of terms used in algebra and analysis (Review by A. Zulauf). 3,123

Joyce, D.C., See Hosking, R.J. 10,132

Koyré, Alexander, See Cohen, I. Bernard. 3,120

Mahler, Kurt, Introduction to p-adic numbers and their functions (Review by D.G. James). 3,125
Mann, W.R., See Taylor, A.E. 4,183

Salas, S.L., and E. Hille, *Calculus. One and several variables* (Review by P. Ramankutty). 5,194

Semple, J.G., See Tyrrell, J.A. 2,57

Shapiro, Harvey L., See Alo, Richard A. 5,193

Turner, J.C., See Hosking, R.J. 10,132

Warrack, B.D., See Naimpally, S.A. 3,129

C. Personal

Prof. K.E. Bullen (Obituary by H.G. Forder). 5,186

P.-A. Dionne (Retirement Note). 7,91

Presentation of Professor Forder for the Honorary Degree of Doctor of Science (K.J. Maidment). 1,1

Introduction of Professor Forder's Invited Address at the Third New Zealand Mathematics Colloquium (J.A. Kalman). 1,2

Professor H.G. Forder : the later years (Gavin Ardley). 9,1

Bibliography of recent works of H.G. Forder (R.E. Swenson). 9,3

Professor Hugh Montgomery (Obituary by M.N. Tweedale). 9,173

Henry Stanley Roberts (Retirement note by H.R. Thompson). 10,181

Cecil Marin Segedin (Retirement note by D.A. Nield). 10,176
